

Table 3: Identification of Potential Pollutant Sources and List of Current BMPs

Area/Activity	Pollutant Source	Pollutant	BMPs	Frequency
Vehicle and Equipment Fueling performed in the fueling area; containing both unleaded and diesel fuel for smaller vehicles and Fire equipment.	Spills caused by topping off fuel tanks	gasoline	1. Train employees in proper fueling and cleanup procedures	1. Continually
	Spills and leaks during deliveries	fuel, oil	2. Discourage "topping off" of fuel tanks	2. Continually
			3. Use absorbent materials on spills as opposed to hosing down	3. Continually
			4. Signage to be installed in pump area with proper fueling techniques	4. Continually Check 2x /yr
Waste Handling and Disposal performed at the trash dumpsters in various locations.	covered trash container/dumpster	Trash	5. Dumpsters have lids kept shut. 6. Place hazardous waste containers in secondary containment 7. Sweep up daily 8. Recycle whenever possible	5. Continually 6. Continually 7. Continually 8. Continually
Vehicle and Equipment Washing performed in the fire stations only.	Washing particulates and debris off vehicles and equipment	sediment, metals, toxic materials, vehicle fluids	9. Wash all small vehicles at an off-site commercial washing location whenever possible 10. If on-site, direct wash water towards surrounding, existing vegetation 11. Wash all fire trucks inside buildings	9. Continually 10. Continually 11. Continually
Landscape, Garden, and General Maintenance and Cleaning performed throughout the facility.	Potential over-irrigation, spills and leaks	fertilizers	12. Promote the use of less harmful products and products that contain little or no TMDL pollutants 13. Use proper lawn management and landscaping, including use of native vegetation 14. Properly recycle yard trimmings 15. Recycle residual paints, solvents, lumber, and other materials as much as possible	12. Continually 13. Continually 14. Continually 15. Continually
Material, Chemical, Vehicle and Equipment Handling and Storage All materials are stored in buildings. Only vehicles are outside.	Vehicle and equipment leaks	gasoline, oil	16. Use drip pans underneath leaking vehicles and equipment	16. Continually
